Indust	trial applicability (IA)	Claims Claims	1-17	YES NO	

#### 2. Citations and explanations (Rule 70.7)

### The claimed invention

The claimed invention relates to providing location information of a user equipment.

The following documents were cited in the International Search Report:

D1: US 6169899 A D2: WO 0152569 A

D1 relates to a system and method for providing historical data for location services. D1 discloses a telecommunications system and method for providing location information that consist of either real-time data or historical data when the subscriber requested to be positioned is either absent or not reachable, to a requesting location application. The historical data is preferably stored per subscriber in a database within a serving mobile switching centre/visitor location register (MSC/VLR) following a successful positioning of that subscriber.

D1 uses location information in order to position the subscriber which implies that a previous positioning must have been carried out.

The claimed invention connection uses information determine the location or position of the subscriber. Connection information includes service area identity or a global cell identity which are available within communication system even if no location request has previously been made.

D2 is considered to merely disclose the state of the art and is not commented on further.
